

# Make Recycling a Habit in the Classroom

## 1. Create Recycling Mailboxes

Have students reuse boxes to create a personalized recycling mailbox where they can practice recycling old homework assignments.

## 2. Reuse Boxes for Playtime

Collect and save all the boxes in the classroom and reuse them the contents at playtime when they're ready to be thrown out, simply empty, flatten and recycle!

## 3. Start a Recycle Library

Students can bring in old picture books or coloring books to share with each other - giving books a second life.

## 4. Encourage Recycling Teamwork

Have students collaborate on what needs to be recycled, stepping in to help when needed. Teach them that recycling is good for the Earth and that paper can be recycled up to 7 times!
